ABOUT STANDARD TIME. Why the System Now Prevailing to

This Country Was Adopted. The old railroad man sat behind the counter of a Chestnut street ticket office, enjoying a mild and meditative eight. A young man with an interrogation point sort of a face leaned over the counter and said: "Heg pardon, may luck, till now he is Independently Baptist church, begins a meeting at I ask a question? Thanks. I observe today, the revival to last two weeks, spicuously printed upon them 'Eastern standard time.' I suppose I'm an awful ignoranus, but I'm bleat if I ever met anyone who could clearly explain the meaning of that. Do you know?"

"I rather think I do," replied the old railroad man. 'Trior to 1883 the clocks of this country were in confusion in describable. Every city, lown and vii lage had its own local time, fixed by solar observations. Then every rail road had its own standard of time, and some of the large systems had several town and asked one of its people the time of day, he would reply with the question: 'City' time or railroad time?' the variation between the two being in some cases nearly an hour. A man first. traveling only from Boston to Washington desirous of keeping his watch even with the time table would use no less than five different standards of time. Providence he would reset his watch she to Providence time, at New London to ism and grand effects the Casino is New York time, at New York-not as one might suppose to the local time of the metropolis, but to Philadelphia time, which was then just five minutes Flower than New York time. All the way from New York to Baltimore bls train would be governed by our own statehouse clock, but at Hallimore be would have hits watch buck two minutes, as the train there took Washington time. Were he to stop off at Trenton or Wilmington or some other intermediate point, the situation would be further complicated, for he would en-

counter 'local' time na soon as he had left the nepot. "Now," continued the old railroad nan, relighting his eigar, "the enormous dangers and inconveniences of this system, or lack of system, early became manifest, and schemes for its lietterment were under discussion for years. Obviously, the ideal solution of the difficulty lay in the establishment of geographient zones or beits, defined by arbitrary lines running designated point within each zone to its boundary fines. Thus much agreed upon, the real trouble began. The maliest crossroids lumlet, as well as he largest city, was willing that every her community in its particular zon After protracted discussion the everal untional organizations of railay officials resolved to disregard all local ciamorings and agreed upon the

Cuntractor F. W. Katterjohn Went Up To-Day to Make a Bid.

Contractor F. W. Katterjohn left this morning for Eddyville to take dimensions, get figures on material, and submit proposals for constructing a large workhouse at the brauch penitentlary.

The workhouse is to be erected on the site on which one of the largest was destroyed several months ago. Since the recent company was organized there for the purpose of making pants, etc., employing for the purpose a large number of the convicts, there has been a growing demand for increased working faellidecided to build another workhouse. Coutractor Katterjohn was summoned this morning, and will doubtless get the contract, which will

late Bot Dayis, of the City of Paducah, Warranted Last

Bot Davis, mate on the City of Paducah, had considerable fou all ninself last night at the wharf. A rouster named Scott claims was entitled to money for labor performed on the steamer. The mate entered a demirrer to his pettion, and Scott concluded to overrule the demurrer. As a result the mate produced the law, which was an overgrown Smith & Wesson pistol. The ronster got mad and imaped into the river, but quickly recovered his wits and swain out.
